

NOTHING ANYMORE

Always in the night
Feeling in a fight
No this time
I won't let you win

I've held you for so long
And waiting to get strong
To break free
And finally I can see who you are

I cried inside
These tears that I proudly protected from you
Now I'm walking through the door
I'm ready to let go
What remains of our love

What we're before
If not even a light could stay on
If not even a memory can remain anymore
And even if you thought I should give it all
Even if I've thought you were my whole world
We're nothing anymore...
No, nothing anymore

I fell everytime
Without a chance to rewind
'cause I tried
But you never let me in

You've hurt me for so long
now I found the words for this song
It made me free
From what I thought was our true love

and this time I cry
With no tears outside that make me see through you
I just walked out through that door
But maybe I'll never know
What remains of our love

What we're before
If not even a light could stay on
If not even a memory can remain anymore
And even if you thought I should give it all
Even if I've thought you were my whole world
We're nothing anymore...
No, nothing anymore
